

**FOR IMMEDIATE RELEASE**

## **Media-Sys Appointed As Exclusive Distributor of CommandFusion**

### **Hardware in Spain & Portugal**

*CommandFusion appoint Media-sys as exclusive distributor of their automation and control hardware range covering the regions of Spain and Portugal.*

**Barcelona, Spain — 24 April 2014**

Spanish distributor Media-Sys has been appointed as the exclusive distributor of CommandFusion hardware covering the regions of Spain and Portugal. Media-Sys plans to offer CommandFusion products to their dealers who up until this point, have struggled to find a control system that is suitable for all projects regardless of size and budget. The hardware range allows Media-Sys to offer a complete turnkey solution, including local specialised support staff to assist dealers with designing and installing first class control solutions.

CommandFusion director Jarrod Bell believes the rapid expansion of their European distributor network is a sign that integrators are ready for something new, he says that their products are providing a much needed, cost effective yet feature packed alternative to more expensive brands.

*“CommandFusion is producing products of the same quality as other, well established brands. This agreement allows Media-Sys to offer competitive & coherent high-end solutions”, said José M. Foguet, CEO at Media-Sys.*

With affordability and a modular, open framework at its core, the CommandFusion hardware range has proven a cost effective and simple way for integrators to provide a reliable automation and control solution. Since being released in 2012, its popularity amongst integrators has been steadily growing. The hardware revolves around a modular

design ensuring that all system sizes from a single room up to an entire campus are cost effective and suited to any unique requirements. Already successful in the home automation industry, the hardware range has allowed CommandFusion to quickly gain ground in the commercial and industrial automation and control sectors. CommandFusion believes in openness: software and hardware protocols are fully published - allowing integrators to mix control systems within a job to suit their requirements and budgets.

### **About CommandFusion**

CommandFusion is a designer of powerful, cost effective automation and control software and hardware. Emphasizing reliability and interoperability, all hardware and software uses openly documented protocols to allow for ease of integration with other systems.

Founded in Melbourne, Australia in 2005, CommandFusion has been selling its flagship software product (iViewer) for iOS since 2008. Renowned for its flexibility and versatility, iViewer is now available for both iOS and Android platforms. The first CommandFusion hardware products were released in 2012. With a small, dynamic and driven international team coming from the automation, software and hardware fields, CommandFusion strives to offer the best support and fastest innovation turnaround in the industry.

### **About Media-Sys S.L.:**

Spanish company Media-Sys was founded in Barcelona in 1991, with a vision of being one of Spain's foremost distributors of high-end solutions for the audio visual integration and rental markets.

On top of supplying quality products, Media-Sys offers support through every stage of its customer's projects. Some of the services offered includes: project design, acoustical measurements, simulations, installation management, commissioning assistance and post-sales service.

CommandFusion Automation Hardware is available in Spain and Portugal from Media-Sys S.L.
