

NEXEVA

FOR IMMEDIATE RELEASE

Nexeva Appointed As Exclusive Italian Distributor of CommandFusion Hardware

CommandFusion appoint Nexeva S.R.L. as exclusive distributor of automation and control hardware covering the country of Italy.

Milan, Italy — 25 October 2013

Italian technology distributor Nexeva has today been appointed as the exclusive distributor of CommandFusion automation and control hardware in Italy. Europe is an important region for CommandFusion, as it represents an area of significant growth for the company's hardware products. This appointment will ensure that local integrators have access to local, Italian speaking support staff trained in CommandFusion products.

“Establishing a relationship with a quality distributor in such an important territory was crucial for us. The popularity of CommandFusion hardware is really growing, and Nexeva is well equipped to handle the demand in Italy”, said Jarrod Bell, Co-Founder, CommandFusion.

Nexeve add CommandFusion hardware to their already extensive range of products, including home automation, commercial control, and communications products. CommandFusion hardware will complement the product ranges that Nexeve currently carry and will allow them to provide a complete turnkey solution to integrators and dealers.

With affordability and a modular, open framework at its core, the CommandFusion hardware range has proven a cost effective and simple way for integrators to provide a reliable automation and control solution. Since its release in 2012, its popularity amongst integrators has been steadily growing. The hardware revolves around a modular design ensuring that all system sizes from a single room up to an entire campus are cost effective and suited to any unique requirements. Already successful in the home automation industry, the hardware range has allowed CommandFusion to quickly gain ground in the commercial and industrial automation and control sectors. CommandFusion believes in openness: software and hardware protocols are fully published - allowing integrators to mix control systems within a job to suit their requirements and budgets.

“CommandFusion hardware is the control system we have been looking for to tie our products together”, said Manuel Elia, Chief Technology Officer at Nexeve S.R.L.

“CommandFusion are continuously updating their products

to meet customer requirements, which is what our customers demand.”

About CommandFusion

Founded in Melbourne, Australia in 2005 as GuiLink then renamed CommandFusion in 2011, the company has been selling its flagship software product (CommandFusion iViewer) for iOS since 2008. Renowned for its flexibility and versatility, iViewer is now available for both iOS and Android platforms. The company has been working on the hardware product line since 2008. With a small, dynamic and driven international team coming from the automation, software and hardware fields, CommandFusion strives to offer the best support and fastest innovation turnaround in the industry.

About Nexeva S.R.L.

Nexeva first opened in 2010 as an “advanced” AV-IT integrated systems distributor.

The team considers Nexeva not as the typical "box mover", but as a partner to installers, offering a high level of support and customized, complete automation solutions.

The company operates across both the professional audiovisual and the home automation markets. Nexeva specializes in many different sales channels including installers, system integrators, resellers and design studios. Nexeva prides itself in distributing an accurate selection of reference market brands.

Nexeva's professional staff have more than 30 years experience in system design, selecting the best technical and economical options from a variety of products. This way they can provide the best possible solutions for resellers and installers.

CommandFusion Automation Hardware is available in Italy from Nexeva S.R.L.
